PROFILE

I am a professional software developer with one year of experience and expertise in multiple skills such as React, Node.js, CSS, JavaScript, and Unreal Engine. I can create working code for any requirement, with a strong knowledge of front-end development as well as the ability to work on backend tasks. Additionally, I am comfortable with any Unreal Engine-related tasks.

SKILLS

- React.js
- JavaScript
- CSS

EXPERIENCE

SOFTWARE DEVELOPER

Ateerna Soution Private Limited, Bangalore Karnataka, India

November 2022 - Present

- Currently working at a company where I specialize in using React for front-end development.
- Collaborated closely with a manager to translate client requirements into actionable features
- Responsible for creating and implementing functional and visually appealing user interfaces
- Adding new features and fixing bugs on existing software through the use of React
- Worked on a project where I effectively utilized Unreal Engine with blueprint to create 3D scenes and levels.
- working with Node.js and Express by creating an API with CRUD operations using a MySQL database,

FRONT-END DEVELOPER (INTERNSHIP)

UXDLAB Software, Noida, Uttar Pradesh, India

August 2022 - September 2022

- Responsible for creating a frontend interface utilizing CSS and Bootstrap and React.
- Utilized React to implement new features and resolve issues on an existing software project
